

- 1. Structural steel studs and framing with batt insulation between studs
- 2. Recessed veneer ledge
- 3. CMU veneer
- 4. Adjustable height veneer anchors @ 16" on center, vertically
- 5. 1" minimum air space with rigid insulation board in drainage cavity
- 6. Vertical flashing leg, 8" minimum
- 7. Weep vents at 32" on center, maximum
- 8. Metal drip edge beyond face of wall
- 9. Exterior sheathing and weather resistive barrier
- 10. Mortar mesh
- 11. Steel relieving shelf angle with brick expansion joint below
- 12. Through-wall flashing with drip edges beneath anchored wall cap
- 13. Flexible sealant at joints between cap stones
- 14. Horizontal Joint Reinforcement

9. Concrete Block Veneer/Steel Framing
